

# Leopard gecko homes

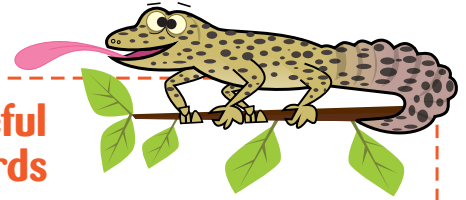

This page helps you to find out how to care for a leopard gecko.

Geckos are lizards. Like all reptiles, they need heat from the environment to warm their bodies. Ask a Pets at Home colleague how they do this.

Find out how colleagues at the Pets at Home store care for leopard geckos to keep them healthy and happy.

Complete and label the pictures of the leopard gecko's home and food store.

Decide how many geckos should live there and label them male or female.

**Useful words**

- heat mat
- heat lamp
- heat pad
- hiding place
- light
- locust
- mealworm
- minerals

- sand
- shelter
- temperature
- thermostat
- vitamins
- vivarium
- water
- waxworm

**Vivarium**

Draw and label everything they need.
